

# Positioning with the Shape Right System

Prone  
in  
Isolette

Do not put the weight of the tube on the infant if the infant is under 27 weeks or less than 3 lbs .

Sidelying  
in  
Isolette

Supine  
in  
Isolette

Supine in  
open crib  
as needed  
to correct  
deformity

Remember, each time you position the infant you are looking to achieve:

- FLEXION
- CONTAINMENT
- ALIGNMENT
- COMFORT

ASK if you have questions as this is a quality improvement project. Thanks in advance!
